**Please note:** While the information in this review is considered true and correct at the date of publication, subsequent changes to the software or vendor policy may impact its accuracy.

#### INFORMATION YOU SHOULD KNOW

- Parent consent for students must be obtained in order to comply with the vendor's Privacy Policy or Terms of Use.
- This service enables students to upload content. Teachers should supervise students to ensure they only upload personally identifiable content, including photos, that is required.

#### TIPS FOR PROTECTING PERSONAL INFORMATION

##### Practice and teach safe online practices (see below)

##### Account creation and use

Students may use their Department email address but should **not** use their Department sign-on password when setting up an account.

##### Creating strong passwords

Passwords created with a combination of upper and lowercase letters, numerals and special characters make it more difficult for other people to guess.

##### Data minimisation

Only provide personal information that is essential for use of the service. Reconsider sharing any optional information including photos. Remind students not to post any photos of other people without permission from the individual and parent.

##### Highest privacy settings

Always check the privacy settings available and apply the highest level.
